65 mm (#10) or .75 mm (#11) blade to make a three hole, wooden gear. The gear also includes a template which you can use to trace and glue onto a sheet of paper. All the files are in pdf format, but you can view the files as a zip to download them. How to make a gear Make sure you have a new set of files. The gear is made from a 7 x 12 inch (18 x 30 cm) piece of paper and a .75 mm (#11) blade. The only special requirements are: you need a 7 x 12 inch (18 x 30 cm) piece of paper and a .75 mm (#11) blade. 1. Cut out the gear Download or print the gear template to a 7 x 12 inch (18 x 30 cm) sheet of paper. 2. Mount the gear Pin the gear template to the paper where the holes will be located. 3. Cut out the holes Remove the template and with the gear in place, cut out the holes. 4. Assemble the gear Place a large sheet of paper between the two pieces of paper and cut a piece out of it to make a hole for the metal to pass through. The paper is cut to the size of the piece of paper in the template. This is a free file in the public domain. B. Gear Free file in the public domain. This free online gear template generator is designed for making scale accurate paper gear templates which you can glue onto wood and then cut out with a .65 mm (#10) or .75 mm (#11) blade to make a three hole, wooden gear. Make sure you have a new set of files. The gear is made from a 7 x 12 inch (18 x 30 cm) piece of paper and a .75 mm (#11) 82157476af
